# Designed to Meet Domain Needs, Engineered for Harsh Environments

Advantech's Embedded Automation Computers have been designed to fulfill the needs of mission-critical automation applications. Their embedded design, industrial features and advanced open computing technology with remote management capability deliver robustness, reliability and flexibility to satisfy customers who are looking for a rugged & compact automation platform with domain features and certifications for their target applications.

## Advantech's Embedded Automation Computer Product Lines

### UNO-1000 Series

#### DIN-rail Automation Computers for Control Cabinets

##### DIN-rail Controller Platforms with Class I, Division 2 Certification

Advantech's UNO-1000 Series are compact and DIN-rail mounted fanless industrial automation computers. They feature a RISC-based processor with a wide operating temperature range (up to 75°C), and are suitable as communication controllers in protocol converter applications and in mission-critical environments.

### UNO-2000/2100 Series

#### Compact Automation Computers

##### Scalable, Low Power Consuming Platforms to Deliver High-performance Computing and Communications

Advantech's UNO-2000/2100 series are fanless wallmounted industrial automation computers with dual sided rich I/Os. They feature a complete range of computing power for a wide array of applications. Different expansion capabilities such as PC/104+ and Mini PCIe slots also allow users to add third party I/O modules.

### UNO-3000 Series

#### Wallmount Automation Computers with PCI/PCle Expansion

##### Front Accessible, High-performance Platforms for Machine Automation Applications

Advantech's UNO-3000 series are fanless wallmounted front access industrial automation computers with PCI/PCle expansion. They feature a wide range of computing power from Intel® Atom™ N270 to Intel® Core™ i7 2655LE processors. Their PCI/PCle expansion capability allows users to add third party I/O modules for a variety of applications.

### UNO-3200 Series

#### High-performance Automation Computers with PCI/PCle Expansion

##### Powerful and Reliable Computing Engines for Critical and Demanding Applications

Advantech's UNO-3200 series are designed to provide computing power and high-speed I/O expansion for demanding applications such as machine controllers with vision & 3D, embedded servers etc. UNO-3200 series offer Intel® Core™2 Duo computing and DVI to handle vision processing and graphic display.

### UNO-4600 Series

#### Substation Automation Computers

##### Rackmount IEC 61850-3/ IEEE 1613 Compliant Platforms with Substation Domain I/O Support

Advantech's UNO-4600 series are designed to work in the substation environment. The isolated I/O lines and isolated power circuitry enhance the anti-interference features. IRIG-B time-sync protocol and fiber optical LAN optional modules also provide the professional domain I/Os for substation applications.

## Reliable Embedded Architecture

Advantech's fanless Embedded Automation Computers with no internal cabling are the best choice for automated applications in harsh working environments. Their embedded designs also include battery-backup SRAM to ensure data storage in case of power failure. Additionally they have been designed as energy saving products, which will save money while helping the planet. With complete Microsoft® Windows® Embedded Solutions, they are highly reliable for any mission-critical automation application.

### Battery-backup SRAM

The onboard battery-backup SRAM saves runtime process data in the event of a power failure. The SRAM can also act as a data buffer that helps to reduce CF access time and extend CF lifetime.

### Fanless Design

Advantech's Embedded Automation Computers are robust computers without rotating parts such as CPU fans, system fans, power supply fans or HDD. The fanless design significantly increases reliability, extends MTTR, and reduces maintenance efforts. As a result, you don't need to worry about CPU coolers or HDD failures, even in dusty environments.

### No Internal Cabling

Unlike generic Box PC designs which use cables for wiring between connectors and CPU boards, the connectors on the UNO series are soldered directly onto the PCB. Therefore, no internal cabling is inside the chassis, which makes Advantech's Embedded Automation Computers more reliable than traditional Box PCs in harsh environments.

### Wide Temperature

Every Embedded Automation Computer is equipped with a tailor-made thermal design for its onboard CPU, RAM and ICs.

## Robust and Reliable Design

With many years of field experience, we continue to improve our products to satisfy automation users' desires. In response to users' needs, Advantech's Embedded Automation Computers provide LAN redundancy teaming function, to prevent information transmission problems when Ethernet is not working. Their tailor-made thermal designs also allow them to operate under a wide temperature range. With IP40 Certification and proprietary enhanced serial communication drivers, Advantech's Embedded Automation Computers are designed to be robust, reliable and flexible in order to fulfill the needs of industrial automation users.

### COM Driver Enhancement

Advantech's Embedded Automation Computers use their own advanced serial communication drivers, which are more time-efficient than standard drivers. The drivers also support any-baud-rate functions for any serial device with special baud rate.

### LAN Redundancy (Teaming)

Embedded Automation Computers support the teaming function. When Ethernet is not working, another port will immediately take over the transmission job.

### IP40 Ingress Protection

Embedded Automation Computers are IP40 certified. With ingress protection, users can use the computers in dusty environments without reliability concerns.

### Patented Serial Communication

Supports not only RS-232/422/485 selection and RS-485 auto-flow control, but also supports many other robust features, such as isolation, EFT protection, and over-voltage protection.

### Industrial Power Design

9 ~ 36 V<sub>DC</sub> Wide Power Input with reverse power polarity protection and ground isolation between chassis and system.

## Value-Added Design for Automation Control

We not only make hardware more robust, but also provide value-added software to make it more intelligent.

### Advantech DiagAnywhere Utility

#### Remote Management Software

- Monitoring & Control
- File Upload & Download
- Screen Snapshot
- Device Grouping
- Screen Recording

## Fieldbus Master Support

Fieldbus is an industrial network system for real-time distributed control. To be an embedded automation computer, this added value will open a door to the critical control applications. We support the following protocols:

CANopen

Modbus-IDA

EtherCAT

EtherNet/IP

PROFINET

PROFIBUS

## Software Solution Partners

### SoftLogic Solution Powered by KW Software

Advantech's Programmable Automation Controller solution leverages KW Software's Multiprog and ProConOS as the single developing tool and SoftLogic control kernel.

### Certified Platform by Wonderware

Wonderware software support allows automation computers to work as HMIs or control nodes. With the provided VESA mounting kit, these computers can be integrated with panel monitors, such as FPM series. With support for touchscreen controllers under WinCE, users can operate the systems through touch. Without the monitor, they can also be a control node for programmed control logic.

### ACP ThinManager® Industrial Thin Client

ACP is experienced in the field of Thin Clients. Since 1999, ACP has been embedding its Thin Client technology into industrial computer products from Advantech, working to bring superior Thin Client devices. When combined with ACP's Thin Client management tool, each ACP Enabled Advantech Thin Client has performance and features unmatched by products from any other company.

## Domain Certification

Advantech's Embedded Automation Computers are designed for domain certification in energy and hazardous locations. With certified designs and domain-specific I/O offering, it helps users to quickly construct robust solutions using Advantech's reliable components.

### Class I, Division 2 Certified for Oil & Gas Applications

The UNO-1100H series are certified to be used in Class I Division 2 Groups A, B, C and D hazardous locations.

Ambient Temperature Range: 0 ~ 60°C

Temperature Code:

Model Name	Temperature Code
UNO-1140FH	T4A
UNO-1150GH/GHE	T3A
UNO-1172AH	T5

The UNO-1100H series have been classified using requirements contained in:

US: ANSI/ISA 12.12.01-2007

- Class I and II, Division 2 Hazardous (Classified) Locations
- Class III, Division 1 and 2 Hazardous (Classified) Locations

Canada: CSA C22.2 No. 213-M1987

- Class I, Division 2 Hazardous Locations

### IEC 61850-3 Standard for Power Substation Applications

The UNO-4600 series are designed to be compliant with IEC 61850-3, which has been defined as an international hardware standard of communication network and system in power substations. In a modern power substation, this standard facilitates the management of a large number of devices and enables various devices to communicate with one another.

Reference	Function	Required for IEC 61850-3
IEC-61000-4-2	ESD	Contact 8KV; Air 15KV
IEC-61000-4-3	RS	35 V/m
IEC-61000-4-4	EFT	4KV
IEC-61000-4-5	Surge	5KV

### Multiple Expansion Capabilities

Advantech's Embedded Automation Computers support versatile expansion interfaces for domain I/Os

UNO-3000 Series with PCI/PCIe

UNO-1100 Series with PC/104+ and Mini PCIe

UNO-2100 Series with PC/104+ and Mini PCIe

UNO-4600 Series with Domain I/O Expansions

# UNO-1000

## Series Introduction & Features

### DIN-rail Automation Computers for Control Cabinets

- Fanless, and Moving Parts for Harsh Environments
- DIN-rail, Front I/O Accessible Design for Control Cabinets
- Battery-backup SRAM Saves Process Data in the Event of Power Failure
- Triple Ethernet Ports, PCI-104, PC/104+, and Mini PCIe Expansion
- A Wide Operating Temperature Range up to 75°C and Wide Power Input Range
- Designed to be Used in High Altitudes up to 13,200 Feet (4,000 Meters)

#### Class I, Division 2 Certification

Tested and designed for CID2 certification, providing safe and reliable operation in hazardous locations, such as liquefied natural gas, onshore drilling production, pipelines and refining applications.

#### System Diagnosis

Providing voltage, temperature and power status, LED indicators give warnings at field sites, and digital output enables remote notification and uploads information to diagnostic software (e.g. DiagAnywhere) for monitoring and controlling.

#### Designed for Control Cabinets

Compact size, DIN-rail mount and front-accessible I/Os for simplified installation and management in cabinets.

#### Battery-backup SRAM

The battery-backup SRAM saves runtime process data in the event of a power failure. The SRAM can act as a data buffer that helps to reduce CF access time and extend product lifetime.

#### Flexible Expansion

With Mini PCIe, PCI-104 and PC/104+, it enables users to easily integrate wireless connections and Fieldbus I/O modules in a single package.

## UNO-1110L/1110/1110T

TI Cortex AM3505 DIN-rail PC with 2 x LAN, 5 x COM, 4 x USB, 1 x Mini PCIe

-10~70°C

## UNO-1270A/1270AE

Automation Computers with 5 x COM, 2 x GbE LAN

# SoftLogic Controller for Factory Automation

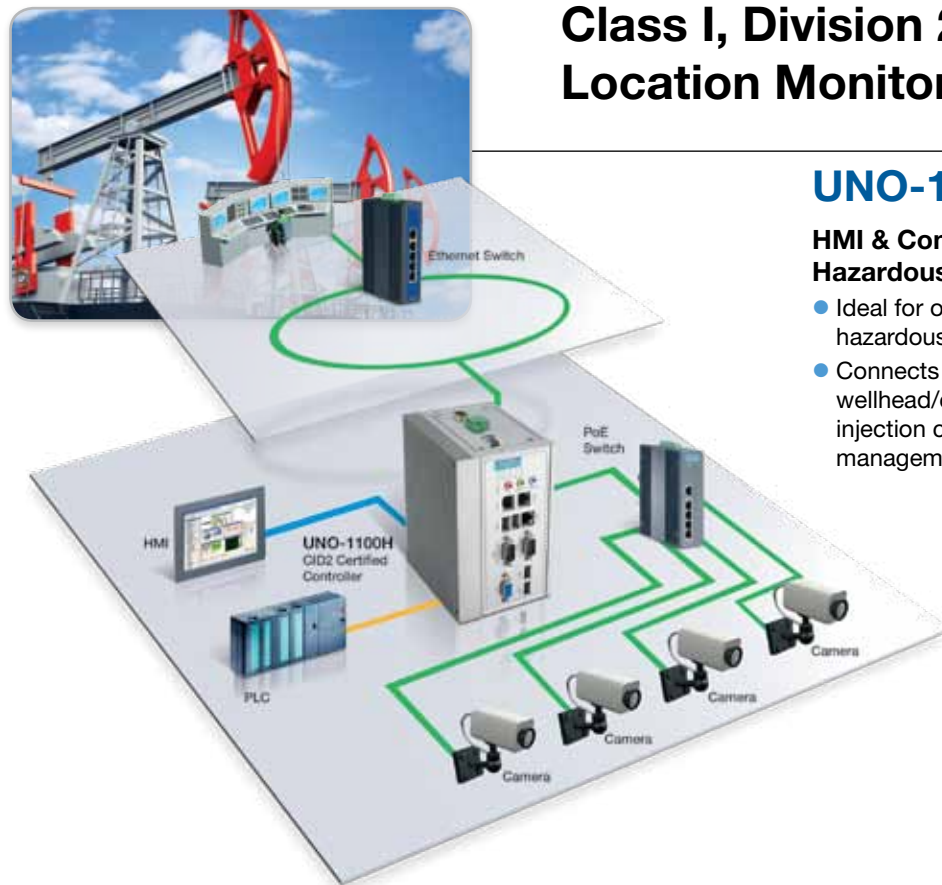

## UNO-1172A/1172AE

### SoftLogic Controllers Connecting a Variety of I/O Devices

- Provides local and remote diagnostic functions for better reliability
- Supports redundancy for fault tolerance via up to three Gigabit LAN ports
- Simplifies maintenance with compact size and front accessible design

## Class I, Division 2 Hazardous Location Monitoring System

## UNO-1100H series

### HMI & Communication Gateways in Hazardous Locations

- Ideal for oil & gas fields, mining and other hazardous locations
- Connects SCADA RTU network, including wellhead/compressor/pumping unit/gas lift/injection control, together to realize centralized management in Distributed Control System (DCS)
- Achieves video security and local trouble-shooting control console by combining CID2-certified grade IP camera, PoE switch and LCD screen

- Fiber Optics
- Ethernet
- Serial (RS-232/422/485)
- I/O, Device, VGA
- APAX Local Bus

# UNO-2000

## Series Introduction & Features

### Compact Automation Computers

- Compact and Small with DIN-rail, Wallmount, and VESA-mount Support
- Industrial Onboard Isolated RS-232/422/485 and Isolated I/Os
- Wide Power Input Range up to 48 Vdc with Reverse Protection
- Low Power Consumption

#### Compact Design

The compact UNO-2000 series are designed to save space in working areas.

#### Diverse Onboard I/O

From isolated digital I/O lines to RS-232/422/485, the UNO-2000 series are ideal solutions for gateway, protocol converter and data server applications.

#### Multiple Mounting Solutions

Support DIN-rail, wallmount and standard VESA mounting, which provides easy installation.

#### Low Power Consumption

Low power consumption with sufficient computing power.

# UNO-2100

Series Introduction & Features

## High-performance Automation Computers with Versatile Expansion

- Provides Diverse Communication Interfaces
- Compact and Small Footprint with DIN-rail, Wallmount, and VESA-mount Support
- Industrial Onboard RS-232/422/485, Supports Any Baud Rate up to 921.6kbps
- Industrial Power Design with Grounding Isolation between Chassis and System

### High Density Cableless I/Os

I/Os like COMs, USBs, LANs and other interfaces with shock resistance and optional isolation.

### Expansion Capability

Expansion for communications, I/Os, and Fieldbus from different interfaces such as PC/104+, Mini PCIe, etc.

### Trusted Industrial Design

Full range of serial ports, e.g. RS-485 with any baud rate, chassis grounding and wide power input.

### Wide CPU Selection and Operating Temperature Range

Selections from Intel Atom to Core 2 Duo computing power for various applications and designed for harsh environments.

4. GbE x 4
5. CFast Card slot
6. DisplayPort
7. HDMI
8. DVI-I
9. 6 x USB 2.0
10. Audio
11. Power eSATA

# Manufacturing Execution System for Production Automation

## UNO-2173A

**A Machine & Production Data Collector to Analyze and Report Data**

- Front accessible I/Os for easy maintenance
- IP40 protection and a wide operating temperature range from -20 to 70°C
- Low power consumption and Energy Star certified

## On-line Testing System in Factory Automation

## UNO-2178A

**Automatic Testing System Connecting to Diverse Devices and Sensors via Multiple COM Ports and Built-in PC/104 & PCI-104 DAQ Modules**

- Intel Atom Dual Core CPU for processing high sampling speed data
- Shock-proof and interference resistant
- IP40 anti-dust approved with a wide operating temperature range from -10 to 70°C
- PCI-104 expansion for DAQ I/O card (Additional expansion kit required)
- Connects up to 8 COM ports for serial devices

# SCADA Server for Distributed Monitoring of Unmanned Stations

## UNO-2174A

**Remote SCADA Server Collecting Equipment Data on Remote Unmanned Stations and Reporting to Central Control Room over LAN/ Cellular Communication**

- Up to 70°C wide temperature support and reliable fanless and cableless design to significantly reduce maintenance effort
- Collects equipment data from I/O modules and PCLs from serial ports and Fieldbus
- Wi-Fi/ Cellular network support for connection with central control room
- DiagAnywhere for cluster monitoring management

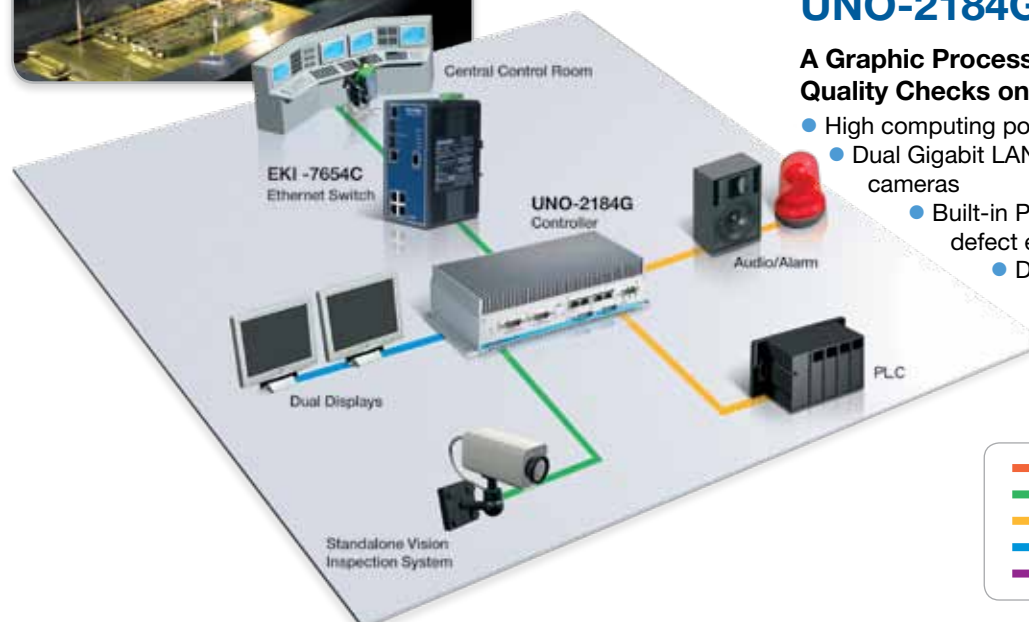

## Defect Inspection System on Production Line in Factory Automation

### UNO-2184G

**A Graphic Processing Controller to Implement Quality Checks on the Production Line**

- High computing power for graphic processing
- Dual Gigabit LAN to connect to industrial IP cameras
- Built-in PCI-104 I/O modules for quality defect event trigger and handling
- Dual displays to monitor different data for its collection and interpretation

- Fiber Optics
- Ethernet
- Serial (RS-232/422/485)
- I/O, Device, VGA
- APAX Local Bus

# UNO-3000

Series Introduction and Features

## Wallmount Automation Computers with PCI/PCIe Expansion

- Wide Computing Power from Intel® Atom™ N270 1.6GHz to Core™ 2 Duo L7500 1.6GHz CPU
- Front I/O Design for Easy Cabling and Maintenance
- Dual SATA HDDs with RAID 0/1 and Network Teaming to Provide Transmission Redundancy
- Dual DVI-I Support for up to Three Displays
- PCI/PCIe Expansion with Card Retainer

### RAID 0/1 Support

With an additional RAID controller or optional onboard RAID functionality, data can be completely backed using the RAID 1 mirror function.

### Front Accessible Design

To help wiring and setup, all I/O lines are located on the front panel of the UNO-3000 series. Easy installation of additional PCI boards and storage devices with a removable top cover.

### Triple Displays

Triple screens benefit large machinery operations with operators on opposite sides.

### LAN Redundancy (Teaming)

The UNO-3000 series support Ethernet teaming. When one Ethernet is not working, another port will immediately take over the transmission job. It also includes a load balancing feature that allows the workload to be evenly distributed across two networks.

### Onboard IEEE-1394b Ports for Machine Vision Applications

The UNO-3000 series are equipped with IEEE-1394b and Gigabit LAN onboard, which allow machine vision application users to directly attach their machine vision cameras without purchasing additional interfaces.

## UNO-3072A/3074A

Intel Atom D510 Automation Computers  
with 2/4 x PCI

Dual GbE  
LAN

IEEE  
1394b

-10~60°C

## UNO-3072LA

Intel Atom N270 Automation Computer  
with 2 x PCI

Dual GbE  
LAN

Dual  
Displays

-10~60°C

## UNO-3082

Intel Core 2 Duo Automation Computer  
with 2 x PCI

Triple  
Displays

IEEE  
1394b

Isolated  
DI/O

-10~55°C

## UNO-3084

Intel Core 2 Duo Automation Computer  
with 3 x PCI and 1 x PCIe

Triple  
Displays

IEEE  
1394b

Isolated  
DI/O

-10~55°C

# UNO-3200

Series Introduction & Features

## High-performance Automation Computers with PCI/PCle Expansion

- Superior Thermal Design Maintains System Temperature even during Full CPU & I/O Loads
- Dual DVI/VGA Displays, Dual Teaming-Capable Gigabit Ethernet Ports
- Battery-backup SRAM Saves Process Data in the Event of Power Failure
- Dual SATA HDDs with RAID 0/1 Support and Dual CF Slots
- PCI/PCle Expansion with Card Retainer

### Ruggedized Design

No cabling or moving parts are present, guaranteeing system resilience in harsh environments.

### LED Indicators for System & I/O Status

There are 16 LED system indicators and four programmable LEDs in the front panel. They are designed to help users to get system profile information at a glance and trigger user-defined alarm messages via programmable LEDs.

## UNO-3272/3282

Intel Core 2 Duo/ Celeron M Automation  
Computers with 2 x PCI/ 1 x PCI and 1 x PCIe

Dual GbE

-20~60°C

### Superior Thermal Design

The UNO-3200 series' superior thermal design combines industrial-grade heat sinks and heat pipes to efficiently manage the system temperature.

### RAID 0/1 Support

With an additional RAID controller or optional onboard RAID functionality, data can be completely backed up using the RAID 1 mirror function.

### PCI Express and PCI Expansion

Next-generation PCI Express allows users to install high-speed I/Os & control boards. The UNO-3200 series offer both PCI and PCIe expansions.

1. External CF
2. RS-232 x 2
3. USB x 4
4. LAN 1~2 LINK/ACT LEDs
5. COM 1~4 Tx / Rx LEDs
6. Programmable LED x 4

1. PCI/PCIe or PCI x 2
2. GigaLAN x 2
3. Audio
4. KB/MS
5. DVI-D/VGA
6. RS-232/422/485 x 2

## Motion Vision Controller in PCB Inspection Machines

### UNO-3084

#### Machine Vision in PCB Optical Inspection

- Onboard IEEE-1394b/ GbE to attach cameras for machine vision inspection
- Triple displays for inspection software, running status and inspection images
- Intel Power Core 2 Duo computing engine for intense visualization tasks
- PCI/PCIe slots for I/Os and motion cards

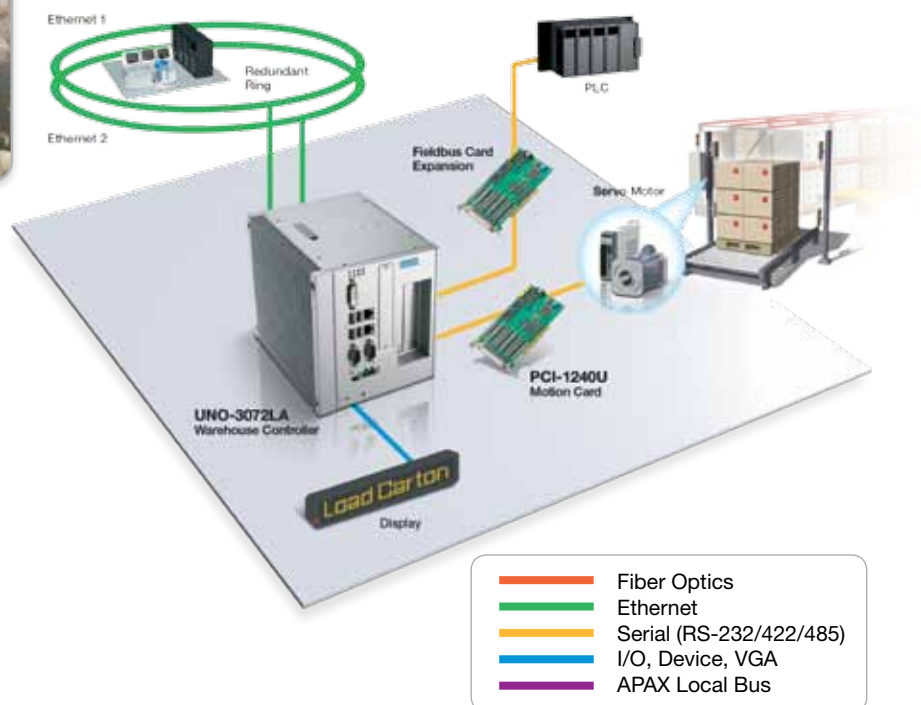

## Dispatch System in Warehouse Automation

### UNO-3072LA

#### Logistic Handling System

- 2 PCI slots for motion card to Servo motor and Fieldbus card expansion
- RS-485 COM port for LED display for inventory status
- Teaming function to ensure central control network

# UNO-4600

## Series Introduction & Features

### Substation Automation Computers

- IEC 61850-3 and IEEE 1613 Standards for Smart Grid Applications
- Compact 2U Rackmount Form Factor to Fit Substation Environments
- Advanced Monitoring and Alarm Features to Ensure Best System Stability
- 3 Expansion Slots for Adding Domain I/Os
- Dual power supplier for system power backup

#### Substation Domain I/O Modules

The UNO-4600 series are equipped with channel-to-channel isolated COM ports and 3 expansion slots for domain I/O modules, such as IRIG-B and Fiber Optic.

#### -20~70°C Wide Operating Temperature Range

Every Embedded Automation Computer is equipped with a tailor-made thermal design for its onboard CPU and RAM. To guarantee its best quality, every Embedded Automation Computer is also required to go through a complete thermal test procedure.

#### Advanced Monitoring and Alarm Function

The UNO-4673A/4683 provide the multi-tier watchdog timer and DO trigger by events. Also, Advantech DiagAnywhere utility enables remote management and diagnosis.

#### IEC 61850-3 and IEEE 1613 Compliant

The UNO-4600 series have robust design on power circuitry, I/O lines, etc., to protect the system from electromagnetic interference in critical substation environments.

IEC 61850-3  
IEEE 1613  
Compliant

## UNO-4672

Intel Celeron M/ Pentium M Automation Computer with 10 x COM, 6 x LAN

PC/104+

Isolated  
DI/O

-20~65°C

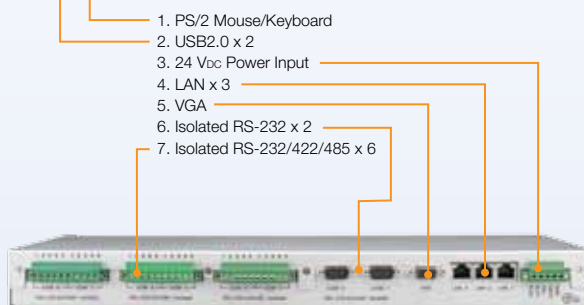

1. USB 2.0 x 3
2. DI/DO with Timer/Counter x 8
3. RS-232/422/485 x 8
4. UNO-P154/P166/P168
5. 106 ~ 250 V<sub>DC</sub> Power Input
6. 90 ~ 250 V<sub>AC</sub> Power Input
7. GigaLAN x 2 and FE x 4
8. VGA
9. Isolated RS-232 x 2

## UNO-4678

Intel Celeron M Automation Computer with 8 x COM, 3 x LAN

1U Rack

10~55°C

1. PS/2 Mouse/Keyboard
2. USB2.0 x 2
3. 24 V<sub>DC</sub> Power Input
4. LAN x 3
5. VGA
6. Isolated RS-232 x 2
7. Isolated RS-232/422/485 x 6

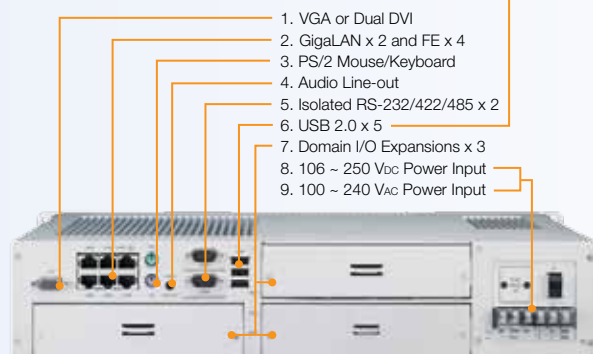

## UNO-4673A/UNO-4683

Intel Atom D510/ Core i7 Automation Computers with Domain I/O Expansions

Dual GbE

Quad FE

-20~70°C

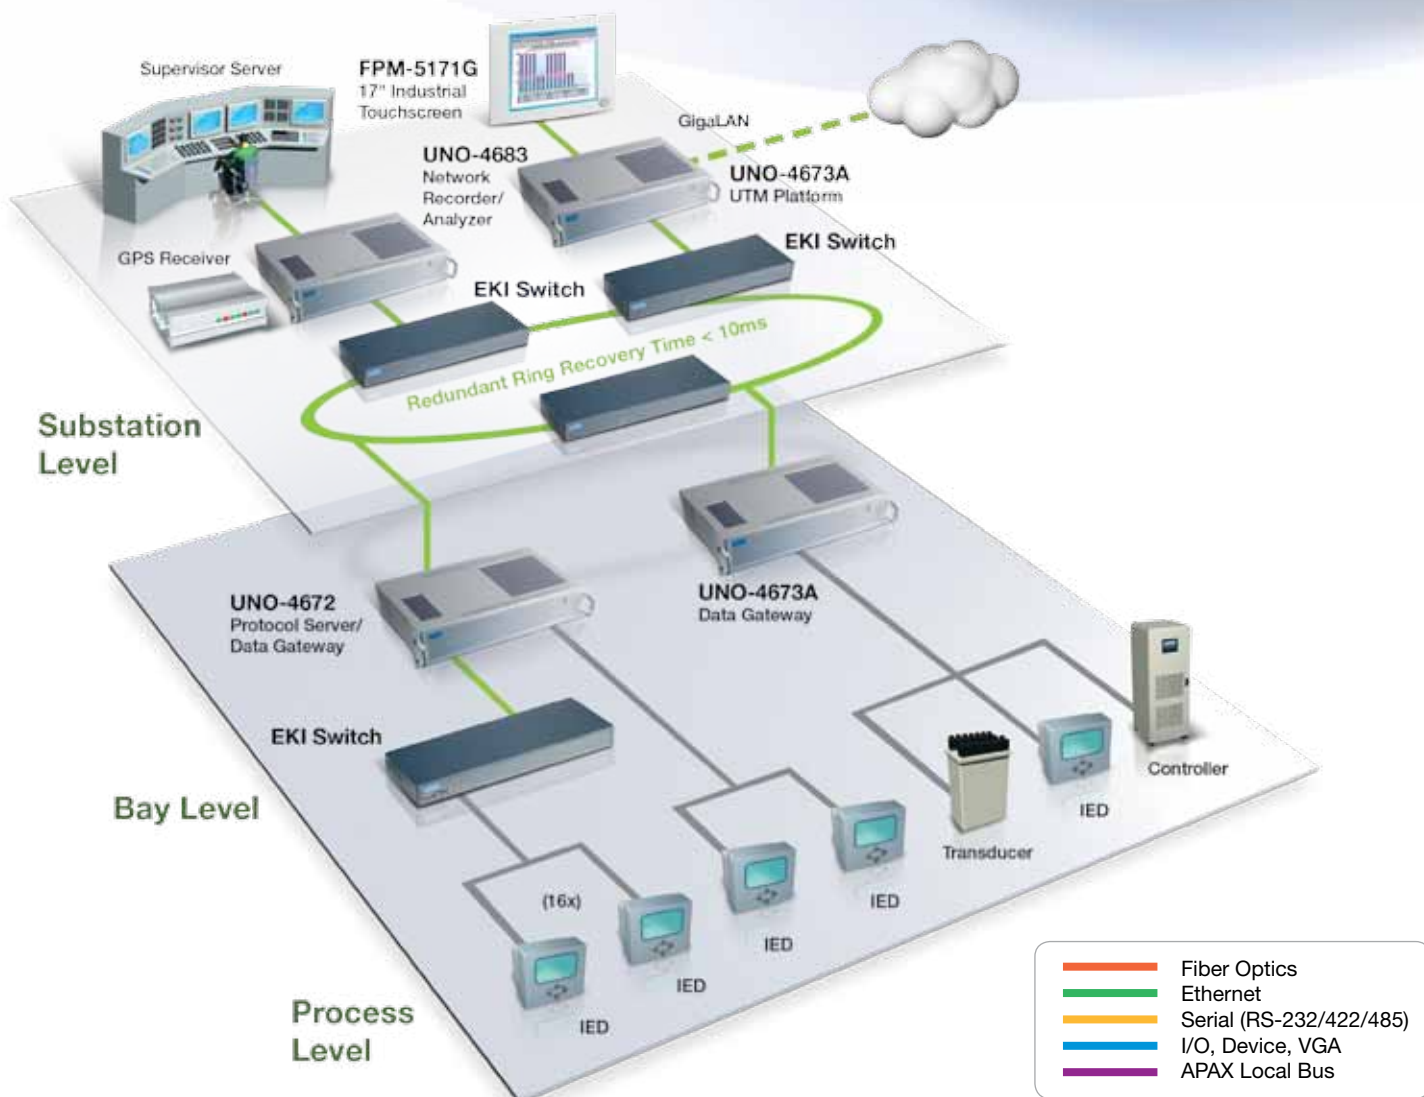

1. VGA or Dual DVI
2. GigaLAN x 2 and FE x 4
3. PS/2 Mouse/Keyboard
4. Audio Line-out
5. Isolated RS-232/422/485 x 2
6. USB 2.0 x 5
7. Domain I/O Expansions x 3
8. 106 ~ 250 V<sub>DC</sub> Power Input
9. 100 ~ 240 V<sub>AC</sub> Power Input

# Certified Automation Computers in Modern Substations of Smart Grids

## Certified Platforms with Domain I/Os to Fulfill Communication Gateway, Network Recorder Analyzer, and Unified Threat Management System in Substations

- Advanced robust design on power circuitry and I/O lines to protect the system from electromagnetic interference
- Provides versatile domain I/O modules, such as isolated COM ports, IRIG-B and Fiber Optic to fulfill the I/O requirements of different application scenarios
- Fiber Optic module for Unified Threat Management (UTM) System
- Smart LAN module implemented by high-speed I/O technology to record and analyze IEC 61850 network packets
